FLAMORT PF-1

FIRE RETARDANT COATING

DESCRIPTION:

Flamort PF-1 is a water-based fire retardant coating formulated for use on polyester 'silk' plants and foliage.

Flamort PF-1 dries to a clear, low satin finish, that is water-resistant. Coated plants are washable by lightly rinsing with water.

Other uses include: straw, cardboard, paper and matchstick bamboo.

Flamort PF-1 has been 3rd party tested (SGS/ U.S. Testing Co.) , and has passed the California Health and Safety Code Title 19 , Section 13115 , Test 1237.1 Small Scale Vertical Burn Test (similar to NFPA 701).

CA. State Fire Marshal Approved and Registered : Reg. # C-00418

APPLICATION:

Stir well before using. **PF-1** can be applied by dipping or spraying methods. Dipping is recommended as the coating is applied more uniformly and thoroughly. After dipping or spraying, shake off excess coating, and hang to dry. Conventional spray equipment may be used. Mask off areas to be protected from overspray, and use dropcloths.

After approximately 60 minutes, while still damp, leaves that are sticking together must be separated.

Always pre-test samples to ensure desired results.

CAUTION:

May be harmful if swallowed. May cause eye and skin irritation.

Use with adequate ventilation. Avoid prolonged breathing of vapors / mist, and prolonged contact with skin.

After using, wash hands thoroughly. Wearing mist masks rated for latex paint, rubber or latex gloves, and an apron is recommended.

Do not take internally. Keep container closed when not in use.

MSDS is available upon request.

KEEP OUT OF REACH OF CHILDREN
